

Article 38(6) Central Securities Depositories Regulation

Participant Disclosure: BNP Paribas Securities (Asia) Limited

Belgium: Euroclear Bank

1. INTRODUCTION

This document describes the level of protection associated with the two types of segregated securities accounts that BNP Paribas Securities (Asia) Limited (“**BNP Paribas**”, “**we**”, “**our**”, etc.) provides in respect of securities that it holds directly for its clients with Euroclear Bank (hereinafter referred to as the “**CSD**”), a Belgium-based international central securities depository. This document includes a description of the main legal implications of the two types of the securities accounts, as well as the applicable Belgian and Hong Kong insolvency rules.

The disclosure of the information contained in this document is required under Article 38 of the Central Securities Depositories Regulation EU (“**CSDR**”). BNP Paribas is subject to these disclosure obligations in its capacity as a Direct Participant of the CSD. The CSD has its own disclosure obligations under the CSDR.

Capitalised terms not defined in the text shall have the meaning given to them in the glossary at the end of this document.

2. BACKGROUND

The custody of the securities of each of BNP Paribas’ clients is held through separate client accounts in its books and records. BNP Paribas has the obligation to segregate in its books the securities of each of its clients from those of its other clients, as well as from BNP Paribas’ own assets.

BNP Paribas also opens securities accounts at the level of the CSD and ensures that its clients’ securities are segregated from BNP Paribas’ own securities in the books of the CSD, irrespective of the type of account described below. CSDs are not permitted to commingle their own assets with securities of their Direct Participants.

BNP Paribas offers the option of establishing two types of client securities accounts with the CSD: Individual Client Segregated Accounts (“**ISAs**”) and Omnibus Client Segregated Accounts (“**OSAs**”) with the CSD. An OSA is used to hold the securities of a certain number of BNP Paribas’ clients on a collective basis. An ISA is used to hold securities of a single client of BNP Paribas and therefore any such securities of that single client are held separately from the securities of BNP Paribas’ other clients.

Although each ISA may be named in a way that identifies the client for whom it is maintained, the client does not have any right or ability to give instructions directly to the CSD with respect to that ISA and therefore holding securities through an ISA does not give the client any operational rights with respect to that ISA.

3. MAIN LEGAL IMPLICATIONS OF LEVELS OF SEGREGATION

3.1 Rules regarding ownership of securities

3.1.1 Legal ownership of securities

The CSD is the Belgian central securities depository for international securities.

The ownership rights of a) securities held on accounts opened by clients with BNP Paribas are governed by Hong Kong law, and b) those of securities held on accounts opened by BNP Paribas, acting on behalf of clients with the CSD are governed by Belgian law. As, by virtue of the *lex rei sitae* principle, such accounts are deemed to be located in Hong Kong and Belgium, respectively.

Under Hong Kong law, holders of securities accounts have a proprietary interest in respect of securities deposited in their accounts opened with an account keeper in Hong Kong. This is in addition to any contractual rights clients may have against BNP Paribas to have the securities delivered to them. This applies both in the case of ISAs and OSAs. However, the nature of clients' interests in ISAs and OSAs is different. In relation to an ISA, each client is beneficially entitled to all of the securities held in the ISA. In the case of an OSA, as the securities are held collectively in a single account, each client is normally considered to have a beneficial interest in all of the securities in the account proportionate to its holding of securities. The books and records of BNP Paribas would constitute evidence of its clients' beneficial interests in the securities.

Under Belgian law, proprietary interests are determined based on the concept of co-ownership. This means that a client, together with other BNP Paribas' clients who hold securities of the same type, jointly own the securities. Each type of securities account constitutes a so-called collective deposit in the books of the CSD. A client's interest in this deposit and the interest of the other investors are shown by the records (which consist of the individual securities accounts of clients) of the CSD. These collective deposits are segregated from the CSD's assets.

As a general principle the records of the CSD are structured to comply with applicable rules and regulations such as the Markets in Financial Instruments Directive 2014/65/EU which regulates the segregation of a client's assets from those of the CSD and other clients of the CSD. The records of the CSD should therefore be sufficient to determine which securities belong to a client of BNP Paribas.

3.1.2 ISA and OSA

Given that under Belgian law, proprietary interests are determined based on the concept of co-ownership, it does not make a difference in terms of asset protection for BNP Paribas or its clients whether securities are held on an individual basis in an ISA or collectively in an OSA at the CSD.

3.2 Insolvency

3.2.1 Insolvency of the CSD

If the CSD were to become subject to insolvency proceedings, any such insolvency proceedings would be opened in Belgium and be governed by Belgian law. Securities held by BNP Paribas on behalf of its clients and sub-deposited with the CSD would not form part of the insolvency estate of the CSD. There would be no difference of treatment between securities held in an ISA or an OSA.

Because collective deposits do not form part of the CSD's assets, clients' securities are protected in the event of the insolvency of the CSD. In the event of such insolvency, an insolvency trustee will be appointed. The insolvency trustee will, on the basis of the records of the CSD, first determine who is entitled to which securities and then proceed to return the securities to their legitimate owners.

Additionally, the CSD is under strict prudential supervision by the National Bank of Belgium in its capacity as the Belgian supervisory authority. If the CSD does not function properly, does not comply with the law, is at risk of becoming insolvent or could disrupt the Belgian or international markets, the government can impose several measures, such as the disposal (i.e., transfer or sale) of assets and liabilities, including the transfer of the CSD's clients' financial instruments.

3.2.2 Insolvency of BNP Paribas

Belgian law would not apply in the context of the insolvency of BNP Paribas, which is a licensed corporation in Hong Kong.

Under Hong Kong law, provided that the securities belonging to the client held in an account are segregated and clearly identifiable on the books and records of BNP Paribas as belonging to such client, and there is evidence of an intention coupled with the conduct of the parties that the securities are held on trust by BNP Paribas, such client has a proprietary interest in those securities.

Securities held by BNP Paribas for a client may also, in certain circumstances, be subject to the provisions of the Securities and Futures (Client Securities) Rules (Chapter 571H of the laws of Hong Kong) ("Client Securities Rules") which prescribe that the relevant securities must either be (a) deposited and held in a segregated client securities account with prescribed custodians or financial institutions or (b) registered in the name of the client on whose behalf the securities have been received. Client

securities held in accordance with the Client Securities Rules will not constitute assets of BNP Paribas available for distribution to its creditors in the event that BNP Paribas becomes subject to insolvency proceedings in Hong Kong.

Under Hong Kong insolvency law, securities that BNP Paribas, as a custodian, held on behalf of clients in Hong Kong would not form part of its estate on insolvency for distribution to creditors, subject to any security interest BNP Paribas may have and provided that the securities remained the property of the clients. Rather, the securities would be deliverable to clients in accordance with each client's proprietary interests in the securities. As a result, it would not be necessary for clients to make a claim in BNP Paribas' insolvency as creditors in this respect.

Accordingly, where BNP Paribas holds securities in custody for clients in Hong Kong and those securities are considered the property of those clients rather than BNP Paribas' property, they should be protected in the event of BNP Paribas' insolvency. This applies whether the securities are held in an OSA or an ISA.

3.3 Shortfall

A shortfall could arise for a number of reasons such as an administrative error, intraday movements or counterparty default.

3.3.1 At the level of the CSD

The risk of shortfall at the level of the CSD is limited by the fact that account keepers such as CSDs, as a matter of Belgian law, are under the obligation to hold either on their books or with another account keeper the same number and type of securities as are credited on the securities accounts they maintain for their account holders.

Royal Decree Number 62 includes an arrangement for the situation where the number of securities of a particular type for which BNP Paribas has credited its clients exceeds the number of securities of that type for which BNP Paribas is credited in the books of the relevant CSD. If there is such a shortfall and BNP Paribas holds with the same CSD securities of the same type, the securities of that type for which BNP Paribas is credited in the books will be used by priority to reimburse the clients. If after this there is still a shortfall, the client will not receive all its securities, but only part thereof, in proportion to its share in the collective deposit. This applies whether the securities are held in an OSA or an ISA.

3.3.2 At the level of BNP Paribas

If a shortfall were to arise on accounts held by the clients with BNP Paribas, Belgian law would not be applicable. . In the case of an ISA, the whole of any shortfall on that ISA would be attributable to the client for whom the account is held and would not be

shared with other clients for whom we hold securities. Similarly, the client would not be exposed to a shortfall on an account held for another client or clients. In the case of an OSA, the shortfall would be shared among the clients with an interest in the securities held in the OSA. Therefore, a client may be exposed to a shortfall even where securities have been lost in circumstances which are completely unrelated to that client.

If a shortfall arose for which BNP Paribas is liable, clients may have a claim against us for any loss suffered. If we were to become insolvent prior to covering a shortfall, clients would rank as general unsecured creditors for any amounts owing to them in connection with such a claim. Clients would therefore be exposed to the risks of our insolvency, including the risk that they may not be able to recover all or part of any amounts claimed.

If securities were held in an ISA, the entire loss would be borne by the client for whom the relevant account was held. If securities were held in an OSA, the loss would be allocated between the clients with an interest in that account. In order to calculate clients' shares of any shortfall in respect of an OSA, each client's entitlement to securities held within that account would need to be established as a matter of law and fact based on our books and records. It may therefore be a time-consuming process to confirm each client's entitlement. This could give rise to delays in returning securities and initial uncertainty for a client as to its actual entitlement on an insolvency.

3.4 Statutory lien

The CSD, as operator of a securities settlement system, is granted a statutory lien over all securities, monies and other rights it holds as client assets of a participant to the system it operates. The lien guarantees exclusively its claims on the participants arising from the clearing or settlement of securities transactions or from the netting of such transactions carried out by the participants on behalf of their clients.

3.5 Security Interests

3.5.1 Security interest granted to third party

Security interests granted over clients' securities could have a different impact in the case of ISAs and OSAs. Where a client purported to grant a security interest over its interest in securities held in an OSA and the security interest was asserted against the CSD with which the account was held, there could be a delay in the return of securities to all clients holding securities in the relevant account, including those clients who had not granted a security interest, and a possible shortfall in the account. However, in practice, we would expect that the beneficiary of a security interest over a client's securities would perfect its security by notifying us rather than the relevant CSD and

would seek to enforce the security against us rather than against such CSD, with which it had no relationship. We would also expect CSDs to refuse to recognise a claim asserted by anyone other than ourselves as account holder.

3.5.2 *Security interest granted to CSD*

Where the CSD benefits from a security interest over securities held for a client, there could be a delay in the return of securities to a client (and a possible shortfall) in the event that we failed to satisfy our obligations to the CSD and the security interest was enforced. This applies whether the securities are held in an ISA or an OSA. However, in practice, we would expect that a CSD would first seek recourse to any securities held in our own proprietary accounts to satisfy our obligations and only then make use of securities in client accounts. We would also expect a CSD to enforce its security rateably across client accounts held with it.

GLOSSARY

Central Securities Depository (CSD) is an entity which operates a securities settlement system and provides at least one other core service listed in Section A of the Annex of the CSDR.

Central Securities Depositories Regulation or **CSDR** refers to Regulation (EU) 909/2014 of the European Parliament and of the Council dated 23 July 2014 on improving securities settlement in the European Union and on central securities depositories.

Direct Participant means an entity that holds securities in an account with a CSD and is responsible for settling transactions in securities that take place within a CSD. A Direct Participant should be distinguished from an Indirect Participant.

Indirect Participant means an entity, such as a global custodian, which appoints a Direct Participant to hold securities for it with a CSD.

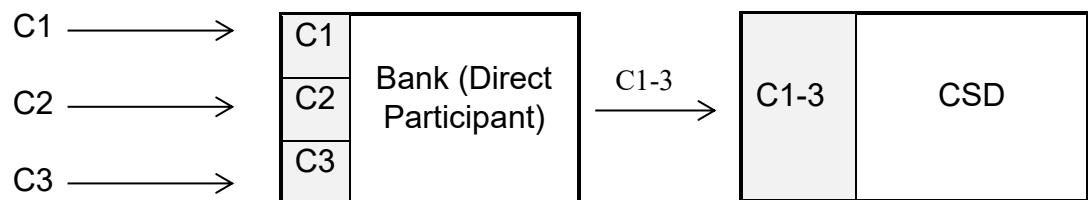

Individual Client Segregated Account or **ISA** means an account used to hold the securities of a single client.

Omnibus Client Segregated Account or **OSA** means an account used to hold the securities of a number of clients on a collective basis.

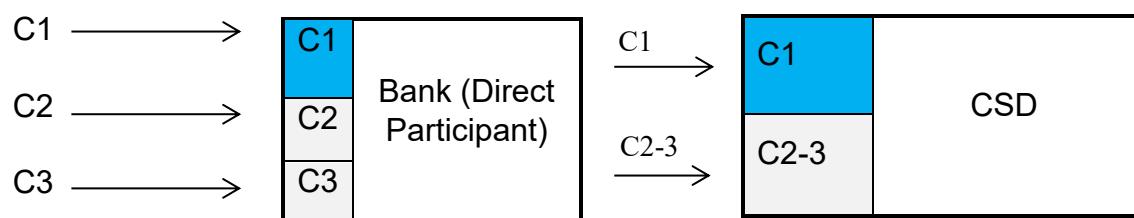

Participant means, as applicable, a Direct Participant or an Indirect Participant.
